

### **Social interactions in the context of durable structures of inequality**

The structures of interest here included class, status and power structures and elite formation. How is the community structured in terms of class, wealth/poverty, and income? What kinds of community elites exist and how integrated are they? Who is most powerful? What forms do genderage inequalities and relations take? In what ways are adult and youth gender relations changing? What is the state of gendered inter-generational relations? What other community-specific status markers structure inequality?
